Limited Volunteer Engagement and Skill Development

1

Passive Participation

Volunteers often only actively participate during the event itself, missing opportunities for meaningful engagement and skill development.

2

Lack of Skill Transfer

Events are often conducted without effectively teaching relevant skills to students, limiting their learning and growth.

3

Lack of Shared Information

When information isn't shared effectively, it can result in less registrations of students.

4

Communication Breakdown

Communication gaps between clubs, organizers, and volunteers can lead to confusion, missed deadlines, and a disjointed event experience.
