Diverse Events for Every Interest

Departmental Events

Teckzite hosts a variety of departmental events, including coding competitions, robotics challenges, design contests, and presentations. Each event is tailored to the specific interests and skills of students in each department.

Open-to-All Events

Beyond departmental events, Teckzite offers a range of open-to-all events, fostering collaboration and learning across disciplines. These events can include hackathons, business plan competitions, and technical workshops.

Project expo

Teckzite promotes interdisciplinary collaboration, allowing students from various departments to work together on challenging projects, fostering innovation and cross-pollination of ideas.

Enriching Workshops & Hackathons

1 Departmental Workshops

Teckzite features workshops tailored to specific departmental fields, providing in-depth training on cutting-edge technologies and practical skills.

2 Open-to-All Workshops

Workshops on broader topics, such as web development, artificial intelligence, or blockchain, are open to all students, encouraging cross-disciplinary learning and skill development.

3 Prize Money & Recognition

Every event winner receives prize money and recognition, incentivizing participation and rewarding excellence in technical skills and problem-solving.

4 Hackathons: Innovative Solutions

Hackathons provide an opportunity for students to work in teams to develop innovative solutions to real-world problems, showcasing their creativity and problem-solving skills.
